

Meningitis Research Foundation Conference, November 1-3, 2021

**Discriminatory host transcripts in the blood of adults with bacterial meningitis: TRIM Study**  
**Dr Mike Griffiths, University of Liverpool**

The challenge of meningitis infection management and future diagnostics with a focus on the TRIM study.

This talk will discuss the ongoing challenges of obtaining an accurate and prompt diagnosis for meningitis and give a brief overview of current available diagnostics. It will then focus on one potential diagnostic solution being developed through the TRIM (Transcripts Identifying Meningitis) study and the road-blocks being overcome to develop this test for clinical use.
