

Meningitis and Septicaemia 2019  
November 5-6, 2019, British Museum, London.

**Debate - Pneumococcal vaccination: is a second year of life booster needed for herd protection?**  
**Prof Adam Finn**, University of Bristol vs **Prof Andrew Pollard**, University of Oxford

WHO has recently recommended that either a 3+0 or 2+1 schedule should be used for vaccination against *S. pneumoniae*. We will debate the following motion:

“This house believes that a 2+1 PCV schedule is preferable to a 3+0 PCV schedule in LMICs.”
